

Assessment System BNB

Application of the Assessment System in Germany

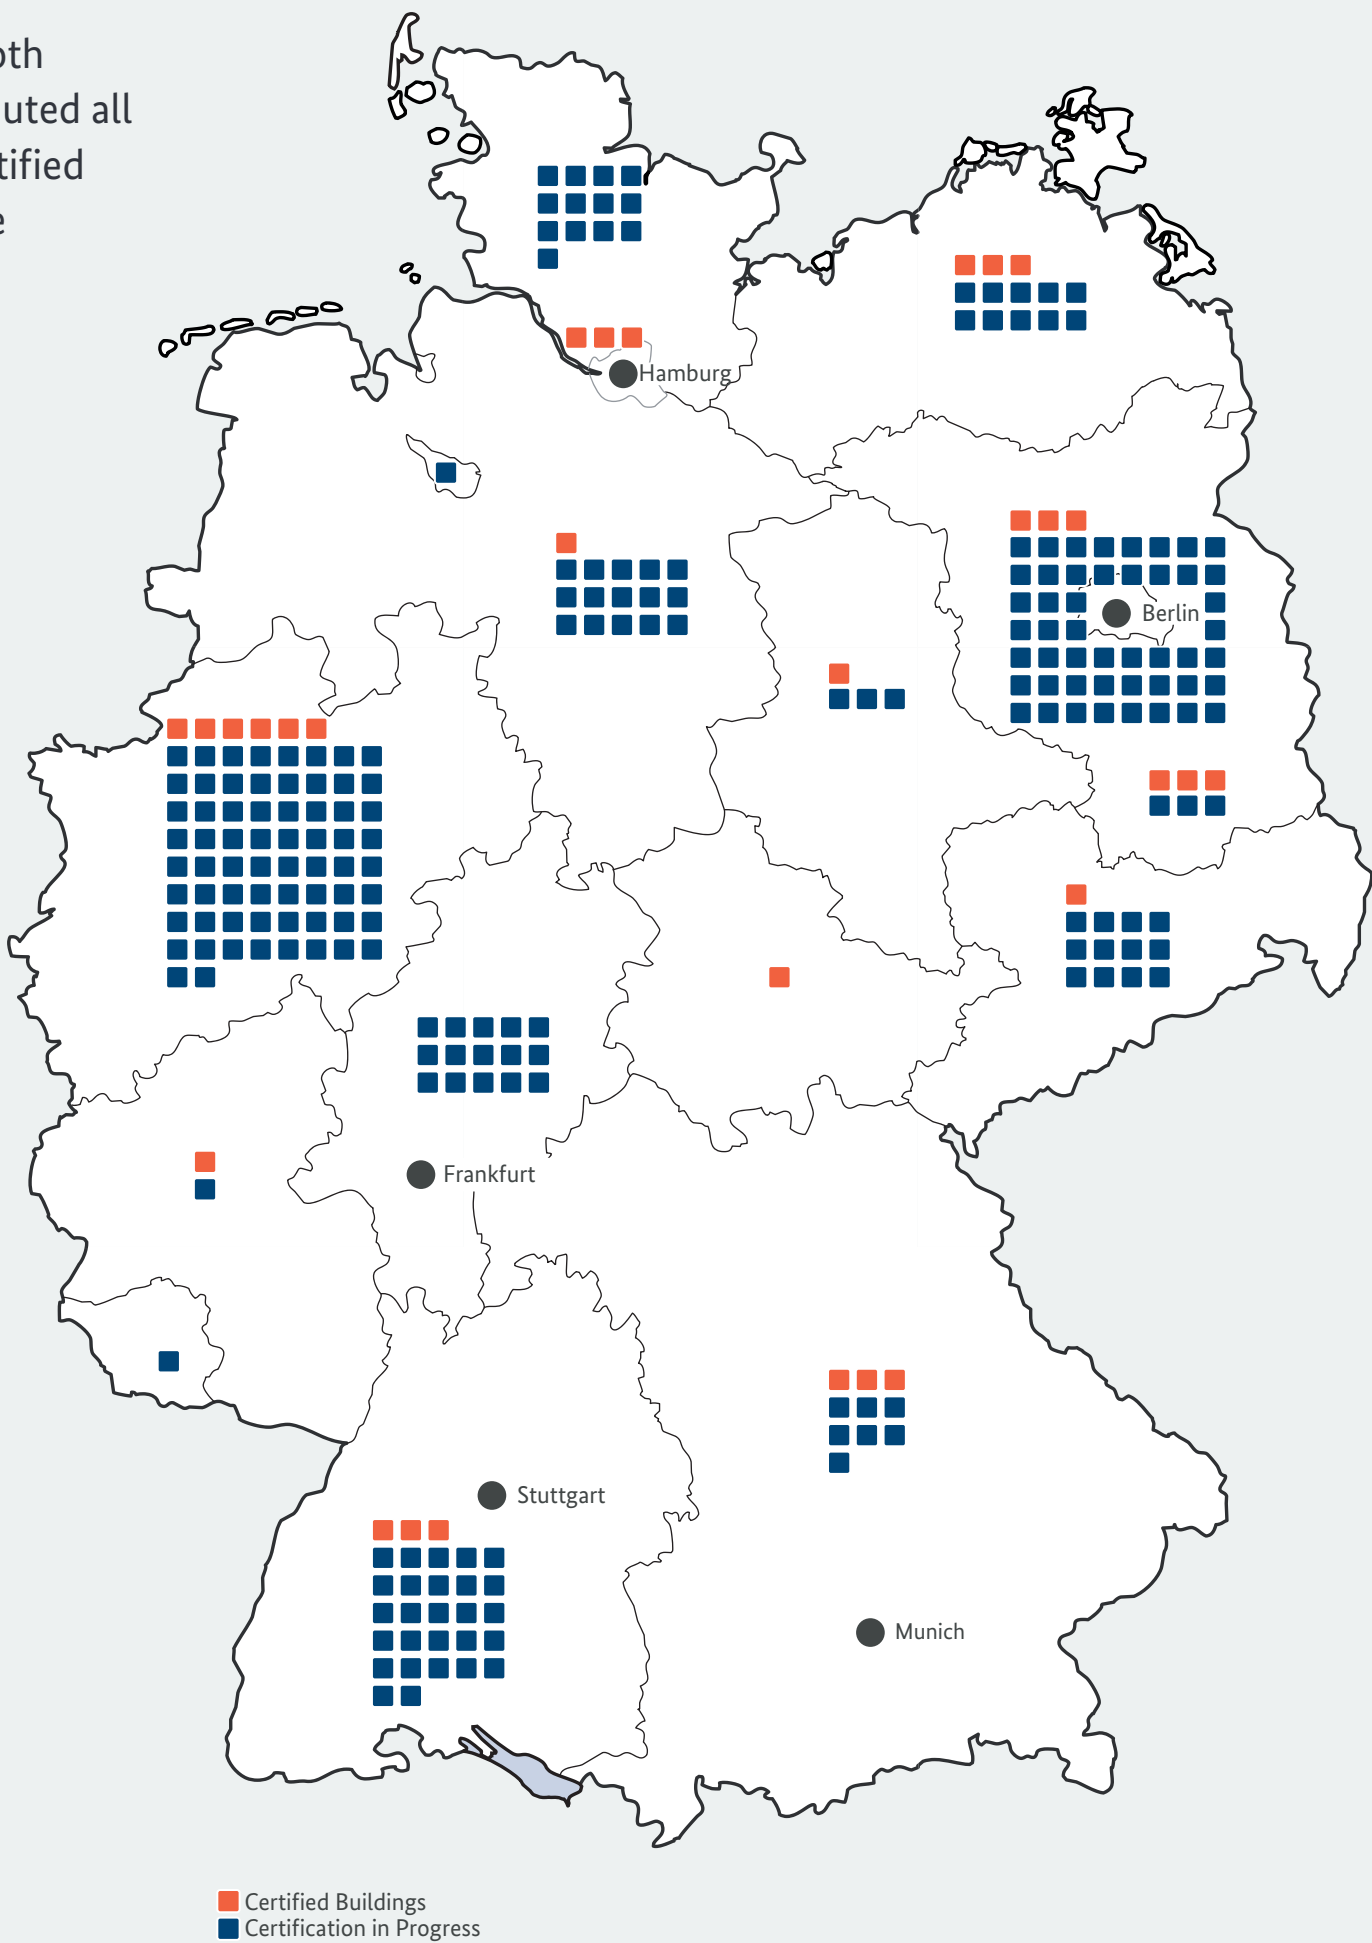

The adjacent map shows BNB-certified projects - both finished and still in progress. The projects are distributed all over the federal states of Germany. There are 29 certified projects so far, but more than 200 projects are in the process of implementation.

Most projects are federal properties, but there is also a growing number of municipal and private buildings implementing the certification with the BNB-System.

The 29 certificates address the following building categories:

- 12 office and administration buildings
- 10 educational buildings
- 7 laboratories

Most buildings reached the silver level, seven buildings were awarded in category gold, five reached the categorie bronze.
